Alison Criss
University of Virginia, United States

Alison Criss, PhD, is Associate Professor of Microbiology, Immunology, and Cancer Biology at the University of Virginia School of Medicine. She received her BA from Williams College and PhD from Harvard Medical School, followed by postdoctoral research at Northwestern University. Dr. Criss' laboratory investigates how the bacterial pathogen *Neisseria gonorrhoeae* recruits neutrophils during infection and survives in their midst. These studies combine cell biological, biochemical, molecular genetic, and imaging-based approaches, including imaging flow cytometry. Dr. Criss' honors include the University of Virginia Pinn Scholars Award for mid-career faculty, American Society for Microbiology Young Investigator Award, and NIH K99/R00 career transitional award. She serves on the NIH Host Interactions with Bacterial Pathogens study section and the editorial boards of *Infection and Immunity* and *Frontiers in Microbiology*. Dr. Criss is also co-founder and Director of the University of Virginia Global Infectious Diseases Institute.
