**Allen Eaves**  
**Stemcell Technologies, Canada**

Allen Eaves, OBC MD PhD FRCPC, was the Founding Director of the Terry Fox Laboratory for Cancer Research (1981-2006) and Head of Clinical Hematology at the University of British Columbia (1985-2003). He has over 200 publications and has been President of ISCT and ASBMT as well as the founding Treasure of FACT. Currently Professor Emeritus of Hematology at UBC, he has devoted himself to building STEMCELL Technologies Inc, a company he founded in 1993 to provide standardized tissue culture reagents for regenerative medicine and for those doing cancer and immunological research. STEMCELL is now Canada's largest biotech company with over 1200 employees and a global network of sales offices and distribution centres serving thousands of customers. He is passionate about providing excellent tools and reagents for biomedical researchers and creating rewarding employment for those who love science but can't always get jobs in academia.
