

International Society for Advancement of Cytometry

Bruno Péault is Professor and Chair at the University of Edinburgh, Center for Vascular Science, and Professor of Orthopaedic Surgery at the University of California at Los Angeles. Scientists in his laboratory have identified perivascular cells as the *in vivo* source of mesenchymal stem cells. Dr. Péault's other research includes the identification, characterization and purification of diverse human stem cells: hematopoietic stem cells, endothelial stem cells, pancreas and respiratory epithelium stem cells. Prior to joining UCLA and, recently, the University of Edinburgh, B Péault serves as a Professor of Pediatrics and co-director of the Stem Cell Research Center at the Children's Hospital of Pittsburgh, as research director at the Centre National de la Recherche Scientifique and department head at the Institut National de la Santé et de le Recherche Médicale in Paris.
