

International Society for Advancement of Cytometry

Larry A. Sklar (Ph.D., Physical Chemistry, Stanford) is PI and Director of the University of New Mexico Center for Molecular Discovery for the NIH Roadmap Molecular Libraries Initiative. He is Regents Professor of Pathology and Distinguished University Professor as well as Associate Director in the NCI Designated University of New Mexico Cancer Center and Director of Translational Technology in the UNM Clinical and Translational Science Center. He has ~350 publications and patents in leukocyte biology, molecular assembly in signal transduction and cell adhesion, as well as high throughput flow cytometry for drug discovery. He is co-inventor of the HyperCyt high throughput flow cytometry platform and co-founder of IntelliCyt.
